Ms. Debbie-Anne Reese, Secretary
Federal Energy Regulatory Commission

Dear Secretary Reese:

In accordance with the requirements of the Interstate Commerce Act and the Rules and Regulations of the Federal Energy Regulatory Commission ("FERC"), Products (SE) Pipe Line Corporation ("PPL"). PPL submits for filing the following tariff, effective March 1, 2025:

- FERC No. 154.20.0, Rules and Regulations Tariff (cancels FERC No. 154.19.0)

PPL is filing FERC No. 154.20.0 to revise its Customer Information Manual (CIM), with Sections 1 and 4 to be effective on March 1, 2025, as shown in FERC No. 154.20.0, Page 13, Note ①, and explained further below.

PPL is modifying Section 1 to update contact information and Section 4 to revise the current RVP schedule. The revisions to the current RVP schedule are removing overlapping cycles to improve our operations and solve our tank constraints that have historically caused longer than normal cycles. This should ensure that there are no delays in the accurate RVP product reaching the desired markets on time.

Additionally, Note ① on page 14 of FERC No. 154.20.0 are instructions on how to locate the Customer Information Manual on PPL's website.

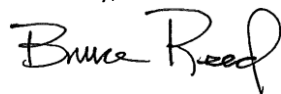

PPL requests special permission to issue FERC No. 154.20.0 on less than thirty days' notice under authority of 18 CFR § 341.14 and § 341.2, so that the changes reflected therein go into effect on March 1, 2025. PPL submits that good cause exists for granting this request. The shippers will have the most up to date RVP schedule for the spring season. All rates in FERC No. 154.20.0 are unchanged from the prior tariff.

In accordance with 18 CFR § 343.3(a), PPL hereby requests that any protest of this filing be sent to PPL at the following email address: Tariff_Group@kindermorgan.com.

I hereby certify that a copy of this filing has been sent by means of transmission agreed upon by the subscriber, to all subscribers on the PPL's subscriber list.

If there are any questions regarding this filing, please contact me at (713) 420-4687.

Sincerely,

Bruce Reed
